OUR MISSION.

Develop helmets that exceed the strictest global safety protection standards.

— 6

OUR PASSION.

Designing helmets for all-day comfort and optimal worker performance.

"Every great adventure starts in your head. We take care of it. We create and develop advanced helmets that combine comfort, safety, and design to look just as great as they perform."

KASK CEO Angelo Gotti

KASK IN THE WORLD

MORE THAN 20 YEARS TO A GLOBAL NETWORK.

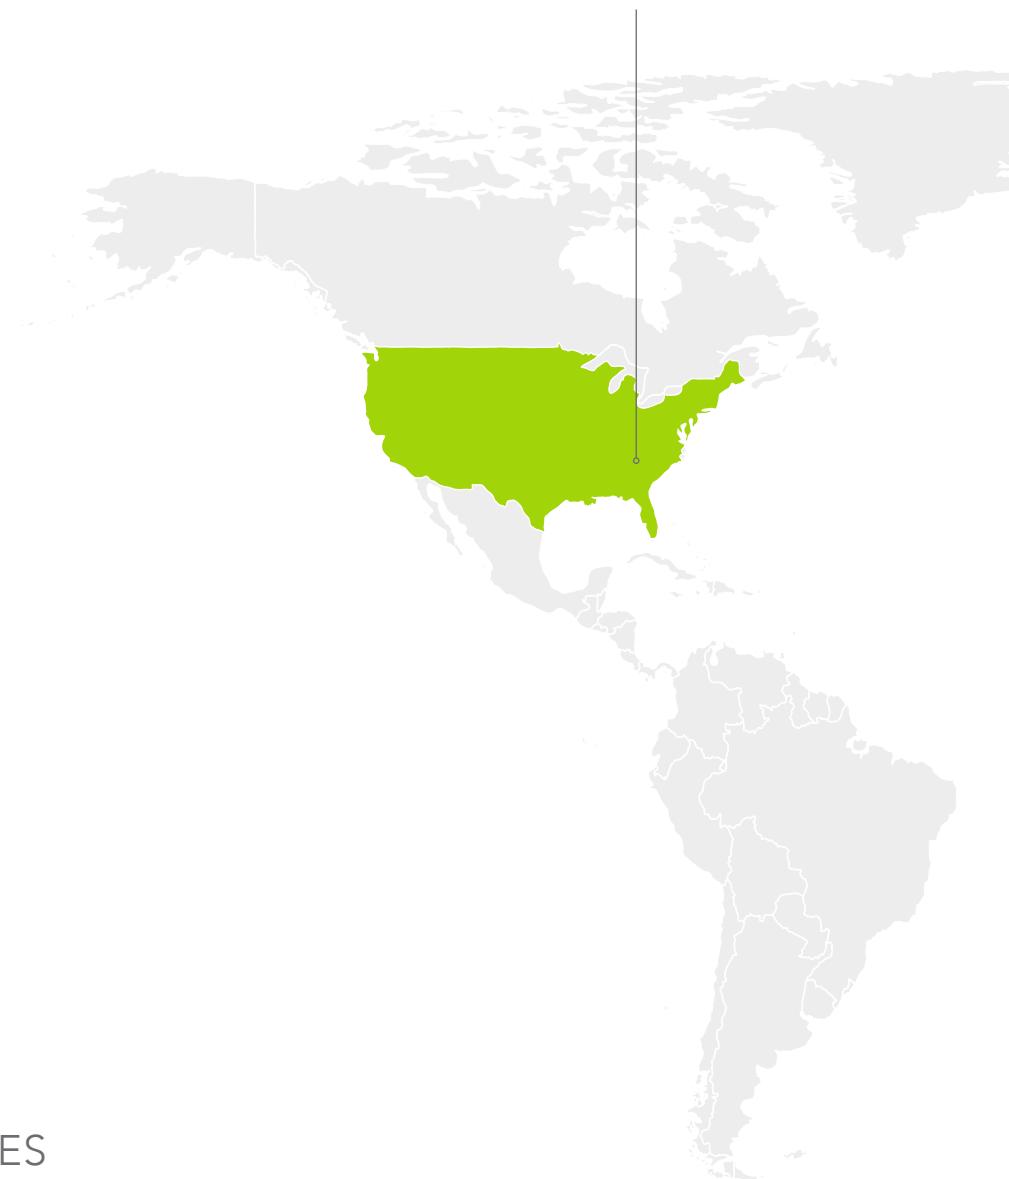

KASK AMERICA
Est. 2010

— 8

📍 3

GLOBAL OFFICES

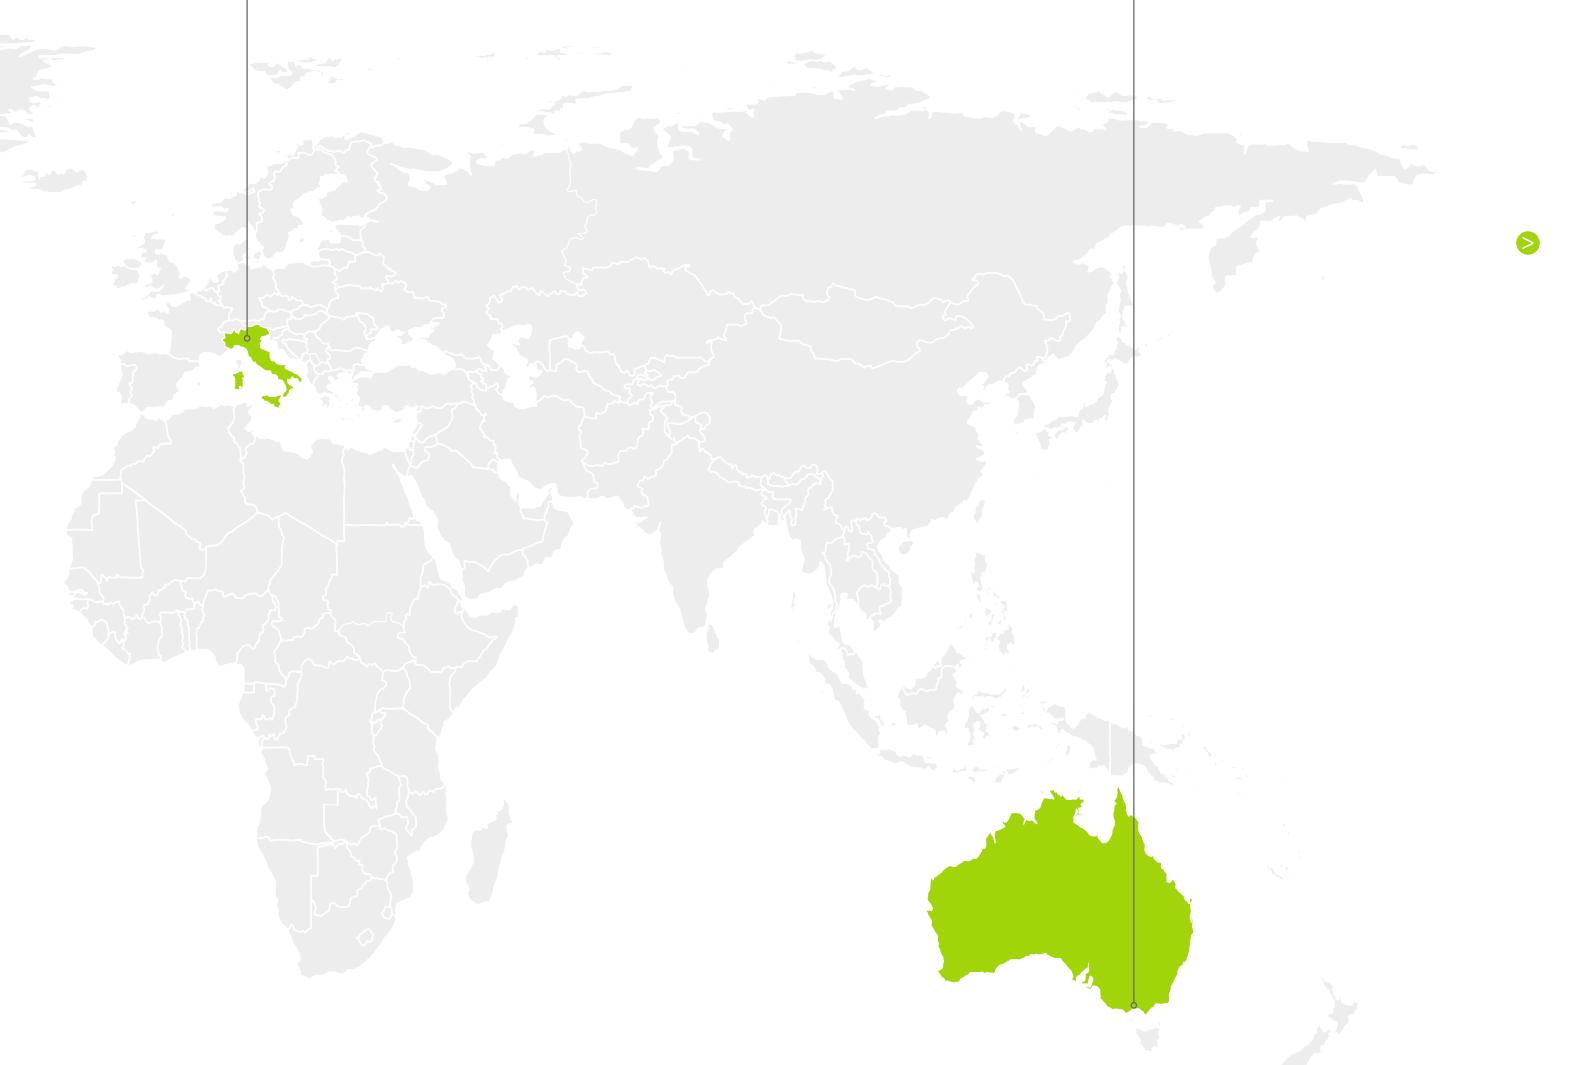

Started in 2004, KASK has built an industry-leading global team of engineers, product specialists, and premier partners.

**KASK ITALIA**

Headquarters Est. 2004

**KASK AUSTRALIA**

Est. 2014

2004

R&D

KASK is founded to develop advanced helmet safety improvements for OEM customers.

2009

SNOW

KASK performance benefits are extended to meet the challenging applications of winter sport enthusiasts.

KASK brings safety, comfort, and design helmet philosophies to demanding cycling market.

KASK shifts from OEM supplier to manufacturer to accelerate innovations in industrial helmets.

KASK comfort and design competencies are extended into the emerging consumer markets.

2021 2024

VOGEL F.LLI FABBRI

KASK acquires Vogel, an American bespoke equestrian footwear brand, sharing the same values of luxury, service, and quality with a dedication to craftsmanship.

Since 1924, Fratelli Fabbri boots have been handcrafted. The exclusivity of Fabbri's products comes from the excellence of the materials and the possibility of making unique customizations that KASK stands for.

2015 2016

EQUESTRIAN

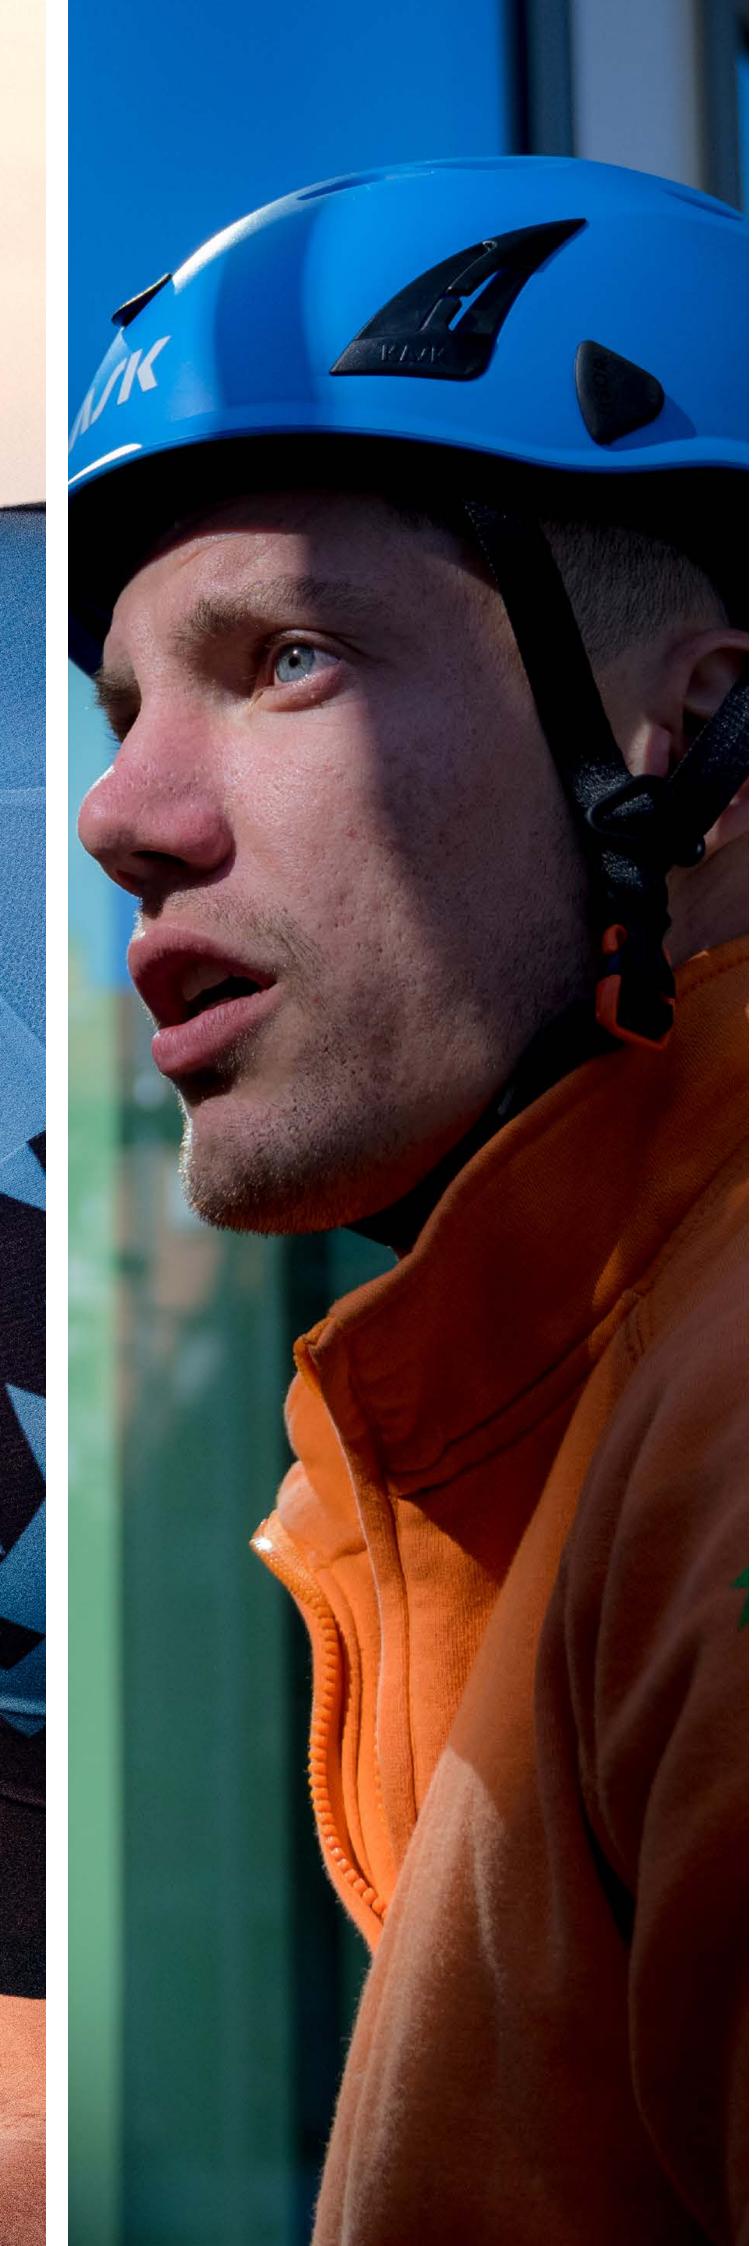

KASK recognizes a gap in protection and performance in equestrian helmets, and delivers advanced design and innovative features.

KOO EYEWEAR

KASK launches new performance eyewear brand to deliver integrated head and eye protection solutions.

KASK

THE KASK DIFFERENCE.

Delivering performance helmets
requires:

- 14 ● a dedication to SAFETY
- a commitment to COMFORT
- a passion for DESIGN

KASK

SAFETY.

Engineered to exceed the strictest global safety protection standards.

The first to introduce high-density polystyrene interior for a complete whole head protection.

Offices in Europe, Australia, and North America ensure KASK helmets exceed global safety standards.

The first to standardize chinstrap systems to ensure consistently secure head protection.

COMFORT.

New technologies that increase worker confidence for all-day performance.

— 18

Ratchet fit systems enable comfort as the wearer's head moves ensuring firm helmet stability.

Integrated ventilation systems that channel airflow through the helmet for all-day comfort.

Advanced materials and fabrics wick away moisture to keep workers cool and dry.

KASK

DESIGN.

Uncompromising attention to details that produces helmets workers want to wear.

Designed with easily replaceable components to ensure helmets are a long-lasting investment.

A suite of advanced, fully integrated accessories that allow all helmets to be customized for your needs.

Recognized by the global design community for exceptional attention to form and function.

KASK ROTATIONAL IMPACT WG11 TEST.

Every KASK helmet is tested for rotational impact performance.

- 22

KASK has always been committed to creating products that provide both excellent safety and comfort, exceeding requirements set by international standards and norms.

KASK WG11 test is an internal protocol adopted by KASK to identify an objective method, based on scientific sources, for measuring the performance of its helmets against rotational impacts.

Most helmets tests use rotational impact prevention technologies with headforms that have a higher coefficient of friction than those of the human skull and therefore may not reflect what occurs in some accidents.

The “pass-fail” criterion is based on the BrIC value, an algorithm that defines the level of brain injury. This value must be lower than 0,68.

The final test protocol is:

OBLIQUE IMPACT TESTs:

oblique tests @ 45°, impact speed 4,5 m/s, BrIC < 0,68

- grade 80 closed-coat aluminum oxide abrasive paper
- headform nominal coefficient of friction 0,3
- wireless system: triaxial accelerometer + n. 3 ARS

Headform: EN 960 series

Measurements: Peak of rotational acceleration, Peak of linear acceleration, HIC, BRIC (< 0,68)

All KASK helmets successfully pass this test with values that are substantially less than 0,68:
BrIC 0,39.

HIGHER RISK OF BRAIN INJURY: >0.68

KASK PROTECTION: <0.39

ROTATIONAL IMPACT WG11 TEST PASSED is a KASK registered trademark. The ROTATIONAL IMPACT TEST PASSED is a KASK internal oblique impact test that measures the performance of its helmets against rotational impacts. This Test has not been adopted by CEN or its Working Group CEN TC158/Working Group 11.

LOWERINg CARBON FOOTPRINT WHILE MAINTAINING KASK SAFETY STANDARDS.

SUPERPLASMA, PRIMERO AND ZENITH X SERIES HAVE THE INTERNAL SHELL MADE OF

- 24

NEOPOR® CCYCLED® EPS IS OBTAINED FROM CHEMICAL RECYCLING OF PLASTIC WASTE AND HAS A REDUCED CARBON FOOTPRINT, ENSURING THE SAME HIGH QUALITY, PERFORMANCE AND SAFETY AS EPS MADE FROM FOSSIL RAW MATERIAL.

SUPERPLASMA

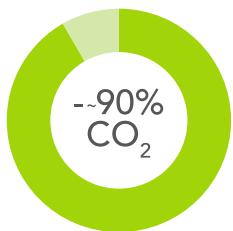

PRIMERO

ZENITH X

BENEFITS OF USING NEOPOR® CCYCLED® EPS

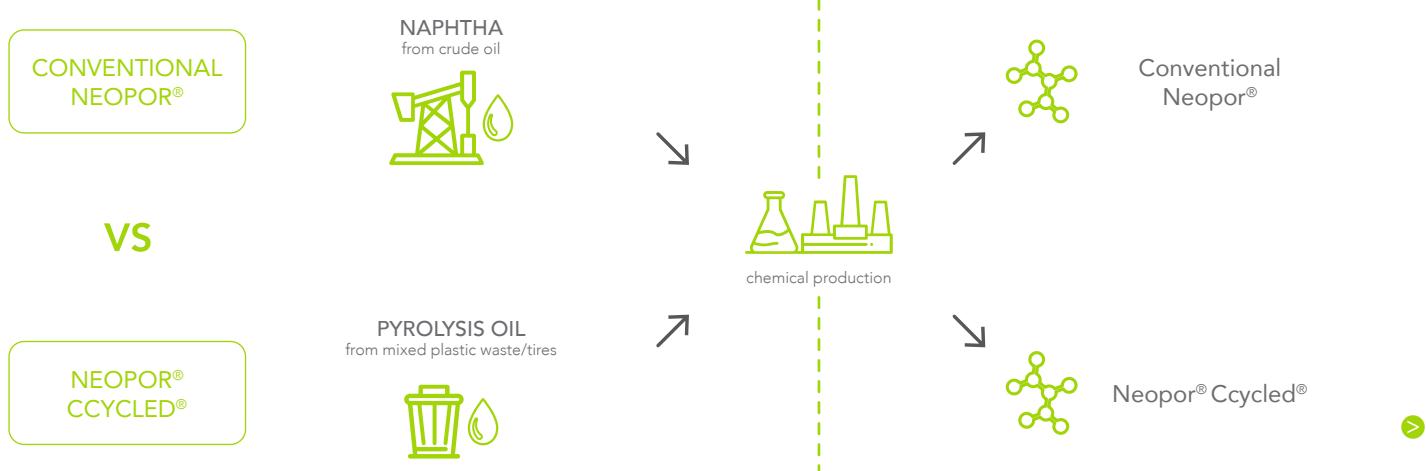

- Ensures the same mechanical characteristics as conventional Neopor®, such as all-around high impact energy absorption
- Saves fossil resources and reduces CO₂ emissions compared to conventional EPS
- Contributes to a circular economy by turning plastic waste into feedstock for the chemical industry, when no other recycling processes are applicable

REDUCED PRODUCT CARBON FOOTPRINT

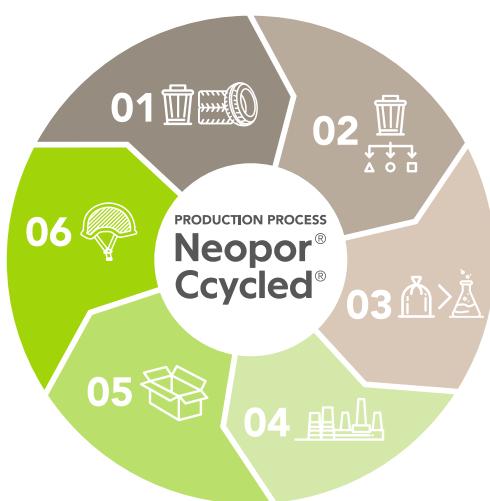

Neopor® Cycled® has a product carbon footprint reduced by about 90% compared to conventional Neopor® produced on the basis of fossil feedstock. CO₂ emissions are saved when manufacturing EPS using pyrolysis oil under a mass balance approach*. The lower emissions result from chemically recycling the mixed plastic waste instead of incinerating it.

THE PRODUCTION PROCESS

CONSERVING RESOURCES

- 01 Consumers dispose plastic products
- 02 Plastic waste is sorted and delivered to BASF technology partners
- 03 Plastic waste is chemically recycled and converted into pyrolysis oil
- 04 The pyrolysis oil obtained is used as feedstock at the very beginning of the BASF value chain
- 05 The pyrolysis oil is attributed to Neopor® Cycled® via a certified mass balance approach*
- 06 New products, e.g. internal shell of KASK safety helmet, are manufactured from Neopor® Cycled®

KASK helmets featuring an internal shell made from Neopor® CCycled® EPS include the entire Primero and Zenith X series, as well as the AQ, AQ HI VIZ, PL, and PL HI VIZ models within the Superplasma series.

* Conventional fossil raw materials required to manufacture BASF products are replaced with recycled feedstock from the chemical recycling of plastic waste or end of life tires along BASF's integrated production chain. The corresponding share of recycled feedstock, e.g. pyrolysis oil, is attributed to the specific Cycled® product via a certified mass balance approach. BASF sites and Cycled® products are third party certified according to internationally recognized certification schemes like REDcert2 and ISCC PLUS and meet the definitions by ISO 22095:2020. The recycled feedstock is not measurable in the BASF mass balance product. The cradle to gate PCF is calculated according to Tfs Methodology using an Upstream System Expansion (USE) approach. USE accounts for a credit for the displaced waste treatment from the first life cycle (e.g. incineration), thereby reducing the product carbon footprint compared to the equivalent conventional fossil product. PCF data is subject to periodical reviews.

HEAD PROTECTION

- 26

GLOBAL ICONS

KASK safety helmets have become recognized around the world for their exceptional safety, attention to design details, and worker comfort.

OVERVIEW OF SELECT STANDARDS FOR KASK HELMETS

SAFETY | WORKBOOK

EUROPEAN STANDARDS

EN 397

The European safety standard for industrial helmets covering top impact absorption, penetration resistance, flame resistance, and chinstrap requirements with additional optional testing.

IMPACT & PENETRATION

- Meets top of head protection requirements

CHINSTRAP STRENGTH

- Withstands >15 kg to reduce risk of coming off in a fall
- Not exceed < 25 kg to reduce risk of strangulation if snagged

OPTIONAL TESTING

- Electrical Insulation (440 Volts)
- Extreme Temperature Resistance
- Molten Metal Splash Protection
- Lateral Deformation

EN 14052

The European High Performance industrial standard for high risk environments covering top and lateral impact absorption, penetration resistance, and chinstrap requirements with additional optional testing.

IMPACT & PENETRATION

- Meets high level top of head & lateral protection requirements

CHINSTRAP STRENGTH

- Withstands >15 kg to reduce risk of coming off in a fall
- Not exceed < 25 kg to reduce risk of strangulation if snagged

OPTIONAL TESTING

- Molten Metal Splash Protection
- Performance at higher and lower temperatures
- Resistance to radiant heat
- Electrical properties

EN 12492

The European safety standard for climbing and mountaineering helmets covering top and lateral impact absorption, penetration resistance, and chinstrap requirements.

IMPACT & PENETRATION

- Meets top of head and lateral protection requirements

CHINSTRAP STRENGTH

- Withstands > 50 kg to reduce risk of coming off in a fall
- Chinstrap is only able to stretch up to 25 mm max
- Helmet must not be able to slide from head

EN 50365

Supplemental to EN 397. The European testing method for electrical insulation helmets in low voltage environments.

REQUIREMENTS

- Helmet must meet requirements in accordance with EN397
- Helmet must not contain any conductive parts
- Air vents (if applicable) must not allow contact with live parts

ELECTRICAL INSULATION FOR A CLASS 0 MUST MEET EITHER/OR

- Protection against alternating voltage up to 1,000 Volts AC
- Protection against direct voltage up to 1,500 Volts DC

AMERICAN STANDARDS

ANSI Z89.1

The U.S. safety standard for industrial helmets covering impact absorption, penetration resistance, flame resistance, and electrical insulation ratings.

HELMET TYPE

- TYPE I – Meets top of head protection requirements
- TYPE II – Meets top and lateral protection requirements

ELECTRICAL INSULATION

- CLASS C – Conductive - No electrical protection
- CLASS G – General - withstands 2,200 Volts
- CLASS E – Electrical - withstands 20,000 Volts

OPTIONAL TESTING

- Meets low or high temperature operating ranges

CANADIAN STANDARDS

CSA Z94.1

The Canadian safety standard for industrial helmets covering impact absorption, penetration resistance, flame resistance, and electrical insulation ratings.

HELMET TYPE

- TYPE I – Meets top of head protection requirements
- TYPE II – Meets top and lateral protection requirements

ELECTRICAL INSULATION

- CLASS C – Conductive - No electrical protection
- CLASS G – General - withstands 2,200 Volts
- CLASS E – Electrical - withstands 20,000 Volts

OPTIONAL TESTING

- Helmet can be worn backwards and meet standards

AUSTRALIAN & NEW ZEALAND STANDARDS

AS/NZS 1801

The Australian safety standard for industrial helmets covering impact absorption, penetration resistance, flame resistance, and electrical insulation ratings.

HELMET TYPE

- TYPE 1 – Meets top and lateral protection requirements
- TYPE 2 – Meets high temperature workplace requirements
- TYPE 3 – Meets bushfire fighting requirements

ELECTRICAL INSULATION

- Operation up to 650 Volts

OPTIONAL TESTING

- Meets low or high temperature operating ranges
- Flame Resistance

ZENITH X

- 30

Our passion for worker comfort and performance fueled the inspiration to design a helmet without compromise – one that is exponentially better.

ZENITH X

FEATURES.

**FRONT ATTACHMENT POINT**

Holds accessories such as badges and headlamps.

**EARMUFF ATTACHMENT SLOTS**

Designed with integrated slots for attaching earmuffs.

**HI-VIZ NAMEPLATE**

Designed with rear high visibility nameplate for easy identification.

— 32 —

**RING TO HOOK**

Enables secure attachment of helmet to harness or other items.

**EASY CLICK SYSTEM**

Integrated slots that enable seamless accessory attachment. Applies to KASK eye, face, and hearing protection.

ECO LEATHER

ADVANCED CHINSTRAP

Eco-leather chinstrap designed with new, rear adjustment points for a more personalized fit. Accommodates wider sizes and adapts to earmuff use. Color-coded fasteners indicate which EN standard the chinstrap meets.

**DRY+ LINER**

Advanced composite fabric integrated with Hydrocool® moisture-wicking technology and exceptionally soft textiles for enhanced user comfort.

**ADAPTIVE FIT SYSTEM**

A size adjustment system which integrates three components for all-day comfort. A new, double diameter dial allows for easier size adjustments. Ergonomic side wings ensure a fast and secure fit against the back of the head. The patented Self Adaptive Live Hinge is the latest, self-adjusting fit technology that moves as the wearer moves.

**POLYPROPYLENE HD EXTERNAL SHELL**

Offers exponentially better impact protection especially at lower temperatures.

**LATERAL ADJUSTMENT DIVIDER**

Side adjustment points on chinstrap for secure fit.

**ELECTRIC SHOCK PROTECTION**

Protection against electric hazards.

**REPLACEABLE LAMP CLIPS**

Four lamp attachment points designed to be removable.

KASK

ZENITH X

Exceptional safety and comfort designed with multiple accessory options for enhanced protection in high voltage environments.

PRIMERO

– 52

Our commitment to safety, comfort, and design enabled the development of a helmet that makes it easy for anyone to experience advanced head protection.

PRIMERO

FEATURES.

FRONT ATTACHMENT POINT

Holds accessories such as badges and headlamps.

POLYPROPYLENE HD EXTERNAL SHELL

Lightweight external shell with exponential better performance. Excels in impact absorption, especially at lower temperatures (-30°C). Resists yellowing and degradation.

EARMUFF ATTACHMENT SLOTS

Designed with integrated slots for attaching earmuffs.

RING TO HOOK

Enables secure attachment of helmet to harness or other items.

EASY CLICK SYSTEM

Integrated slots that enable seamless accessory attachment. Applies to KASK eye, face, and hearing protection.

ADVANCED LITE CHINSTRAP

Chinstrap with 5 adjustment points for a personalized fit. Accommodates wider head sizes and adapts to earmuff use. Color-coded fasteners indicate EN standard compliance rating.

**CLICK-IN SYSTEM**

Attachment system that lets padding easily snap in and out.

**NEOPOR® CCYCLED® INTERNAL SHELL**

Inner shell composed of high-density Neopor® Cycled® foam for all-around impact energy absorption and improved comfort.

**VENTILATION CHANNELS**

14 air intakes shaped for preventing debris entry.

**ERGO FIT SYSTEM**

Helmet size adjusting system that allows for an easy and secure fit by turning the large diameter dial. The system moves up and down to adapt to a range of head shapes. The ergonomically shaped wings cradle the back of the neck for added comfort.

**2DRY LINER**

Moisture-wicking fabric technology for all-day comfort.

**LATERAL ADJUSTMENT DIVIDER**

Side adjustment points on chin strap for secure fit.

PRIMERO

Advanced head protection made easy.

SUPERPLASMA

– 68

With a globally recognized design that signals KASK, these helmets enable workers to perform with confidence in a variety of demanding applications.

R130

SUPERPLASMA

FEATURES.

VENTILATION CHANNELS

Helmet designed with 10 air intakes that maximize internal airflow through outflow channels providing exceptional helmet breathability.

ANTI-INTRUSION MESH

Metal mesh vent covers that prevent debris from entering the ventilation channels while maintaining breathability.

HD POLYPROPYLENE EXTERNAL SHELL

Offers high impact resistance and lighter weight.

INTEGRATED LAMP CLIPS

Designed with 4 built-in, nylon lamp attachment points. Compatible with KASK headlamps and other headlamps with elastic bands.

LATERAL ADJUSTMENT DIVIDER

Side adjustment points on chinstrap for secure fit.

**2DRY LINER**

A quick-drying technical fabric that accelerates the dispersion of sweat and moisture to the surface of the helmet padding for a dryer, more comfortable wear.

**VISOR ATTACHMENT POINTS**

Helmet designed with attachment points for securing KASK eye protection accessories.

**QUICK FIT SYSTEM**

Size adjustment system for maximum stability, easy to use thanks to a large diameter wheel.

**DETACHABLE INNER PADDING**

Hook-and-loop-enabled for easy removal, replacement, and washing.

**EARMUFF ADAPTER ATTACHMENT POINTS**

Helmet designed with attachment points for earmuff adapters.

KASK

SUPERPLASMA AQ

EYE & FACE PROTECTION

— 84

SEE EASY

An advanced range of eye and face protection solutions designed to meet workers' needs for an expanding variety of dynamic hazardous environments.

OVERVIEW OF SELECT STANDARDS FOR KASK EYE & FACE PROTECTION

EUROPEAN STANDARDS

EN ISO 16321

The new European safety standard required for eye and face protection for industrial use.

- EN ISO 16321-1:2020 (Part 1) – General requirements
- EN ISO 16321-2:2020 (Part 2) – Welding requirements
- EN ISO 16321-3:2020 (Part 3) – Mesh visor requirements

MARKINGS:

OPTICAL CLASS

- 1 – Enhanced optical performance (optional)

LIGHT PROTECTION CODE

- W – Welding filter (scale of 1.2 to 10)
- U – Ultraviolet filter (scale of 1.2 to 5)
- R – Infrared filter (scale of 1.2 to 10)
- G – Sun glare filter (scale of 0 to 4)
- L – Lens does not affect color or light

HEADFORMS

- 1-S - European headform Small
- 1-M - European headform Medium
- 1-L - European headform Large
- 2-S - Asian headform Small
- 2-M - Asian headform Medium
- 2-L - Asian headform Large
- M – Medium size only

— 86 —

MECHANICAL PROTECTION

- C – Low Impact Resistance (45m/s) + OPZ*
- D – Medium Impact Resistance (80m/s) + EOZ*
- E – High Impact Resistance (120m/s) + FPZ*
- CT – Low Impact at Extreme Temp (45m/s)
- DT – Medium Impact at Extreme Temp (80m/s)
- ET – High Impact at Extreme Temp (120m/s)
- HM – High Mass (500g) Impact Resistance

* Note: Impact protection levels are now accompanied by a protection zone code — the higher the impact level, the larger the required protection zone.

OPZ: Orbital Protection Zone

EOZ: Extended Orbital Protection Zone

FPZ: Face Protection Zone

FIELD OF USE

- 3 – Protection against liquid droplets
- 4 – Protection against large dust particles
- 5 – Protection against gas and fine dust particles
- 6 – Protection against streams of liquid
- 7 – Protection against radiant heat
- 9 – Protection against molten metal and hot solids

OPTIONAL REQUIREMENTS

- K – Protection against fine dust particles
- N – Resistance to lens fogging
- CH – Chemical resistance

EN 166

The core European safety standard required for eye and face protection. Includes a number of sub-categories.

SUPPLEMENTAL STANDARDS

- EN 167 – Optical test methods
- EN 168 – Non-optical test methods
- EN 169 – Welding filters and related techniques
- EN 170 – Ultraviolet (UV) filters
- EN 171 – Infrared filters
- EN 172 – Solar filters for industrial use
- EN 1731 – Mesh face protection
- EN 379 – Automatic welding filters
- DGUV GS ET29 / ET30 – Arc flash protection

MARKINGS:

There are a number of standards and markings for eye and face protection. Selected ones are described here. Contact a KASK representative for additional information.

OPTICAL CLASS

- 1 – Best optical quality, for regular use
- 2 – Lesser optical quality, for occasional use
- 3 – Lowest optical quality, for exceptional use

LIGHT PROTECTION CODE

- NONE – Welding filter
- 2 – Ultraviolet filter
- 2C – Ultraviolet filter with good color recognition
- 4 – Infrared filter
- 5 – Solar filter
- 6 – Solar filter with infrared protection

LIGHT PROTECTION GRADUATION

- 1.2 – Clear
- 1.7 – Yellow, clear with mirror finishing, UVR
- 2.5 – Brown, smoke
- 3.1 – Green, smoke with mirror finishing
- 3,2,5,...11 – Welding

MECHANICAL PROTECTION

- A (T) – Resistance to high speed/high energy impact
- B (T) – Resistance to high speed/medium energy impact
- F (T) – Resistance to high speed/low energy impact
- S – Increased robustness
- A, B, or F, followed by T, indicates extreme temperature impact protection (-5° C / +55° C)

FIELD OF USE

- 3 – Protection against liquid droplets, splashes
- 4 – Protection against large dust particles
- 5 – Protection against fine dust particles
- 8 – Protection against short circuit electric arcs
- 9 – Protection against molten metal and hot solids

OPTIONAL REQUIREMENTS

- K – Protection against fine dust particles
- N – Resistance to lens fogging
- H – Products designed for small heads
- R – Enhanced infrared reflectance

AMERICAN STANDARDS

EN 14458

The European standard for high performance visors used with protective helmets for firefighting, ambulance and emergency services.

MARKINGS:

CLASSIFICATION

- = – General use
- + – Firefighter use
- NONE – Net visors

PROTECTED AREA

- (– Face protection
- (– Eye protection

MECHANICAL & LIGHT PROTECTION

(same as EN ISO 16321 & EN 166)

ANSI Z87.1

The U.S. safety standard for testing, marking, and maintaining eye and face protection – includes sub-categories.

SUPPLEMENTAL STANDARDS*

ASTM F2178 – Arc flash protection

MARKINGS:

There are a number of standards and markings for eye and face protection. Selected ones are described here. Contact a KASK representative for additional information.

MECHANICAL PROTECTION

- Z87 – General lens and frame impact resistance
- Z87+ – Impact mark

FILTER PERFORMANCE

- NONE – Clear lens
 - U – Ultraviolet filter
 - V – Variable tint filter
 - W – Welding filter
 - L – Visible light filter
 - R – Infrared filter
 - X – Anti-fog filter
 - S – Special purpose lenses
- Symbols are followed by a number, indicating filter performance level

FIELD OF USE

- D3 – Protection against droplets, splashes
- D4 – Protection against dust
- D5 – Protection against fine dust

OVERVIEW OF TECHNOLOGIES.

COMPATIBLE WITH GLASSES

Designed for use over corrective glasses.

ANTI-FOG

Equipped with an anti-fog treatment to increase wearer visibility when active and in a variety of conditions.

MICRO VENTILATION

Provides airflow and breathability while resisting debris intrusion.

PANORAMIC LENS

Developed to maximize visibility with minimal viewing distortion.

CUT PROOF EDGE

Eye shield edge detail designed with a cut proof edge for enhanced wearer safety.

DRIP PROOF UPPER CONTOUR

Rubber edge protects eyes from liquid and debris from entering the visor.

DEBRIS PROTECTION

Designed with a reinforced frame for protection against debris.

HEXAGONAL MESH

Hexagonal matrix pattern enables airflow, visibility, and durability.

ANTI-INTRUSION GUARDS

High-comfort, polyurethane foam that protects from dust, liquid, and chemical splashes.

STABLE CARRIER

Reinforced face shield carrier for added protection and durability.

SEE-THROUGH CHIN PROTECTION

Equipped with transparent chin protection for enhanced range of worksite visibility.

ABRASION AND SCRATCH RESISTANCE

Lens treatment designed with protection from abrasion and scratches with increased durability and viewing clarity.

EXTREME TEMP IMPACT RESISTANCE

Able to withstand impacts at extreme temperatures for use in a variety of environments.

> CRI 95

Designed with excellent Color Rendering Index performance for greater color contrast and visibility.

KASK

- 108

OVERVIEW OF TECHNOLOGIES.

EASY ATTACHMENT SYSTEM

Integrated slots in helmet that enable attachment of accessories.

EARMUFF COMPATIBLE

Can be used with KASK hearing protection.

FORM FITTING

Designed to work with helmets without compromising fit.

- 110

ERGONOMIC FIT

Designed with an ergonomic neck cut for optimal head movement.

CLICK-IN ATTACHMENT

Easy-to-use system that attaches directly to the helmet allowing secure accessory connections.

NECK AND EAR PROTECTION

Designed to protect the neck and ears from weather and the environmental elements.

ADJUSTABLE SIDE COVERAGE

Allows quick and easy adjustments while being worn.

BREATHABLE

Designed to be breathable with increased airflow.

UNDERSURFACE SUN REFLECTION

A dark undersurface prevents sun reflection and enhances all-day comfort.

UV PROTECTION

Treated to protect from sunlight and block ultraviolet rays.

WATERPROOF

Designed with rain protection of up to 10 meters of water column.

WINDPROOF

Blocks wind for added comfort in different weather conditions.

WIND RESISTANT

Protects from light wind without affecting breathability.

COLD RESISTANT

Insulated accessories for enhanced comfort and protection in cold environments.

WATER RESISTANT

Designed with light rain protection and water repellency.

HYDRO OIL REPELLENT

Protects and repels from water and oil infiltration.

MOISTURE-WICKING

Designed with a fabric for dispersing sweat and moisture.

ILLUMINATING SOLUTIONS

Lighting accessories that attach to KASK helmets to brighten worker sight lines in low-light conditions.

OVERVIEW OF TECHNOLOGIES.

ADVANCED FOCUS SYSTEM®

Patented technology that allows a seamless transition from broad low beam to sharply focused high beam.

DUAL POWER SOURCE

Equipped with two battery types; a rechargeable lithium-ion battery and regular AA alkaline battery, to provide flexibility in a variety of applications.

OPTISENSE® TECHNOLOGY

Technology that automatically adapts to the present light conditions – controlling the luminosity based on the reflecting surrounding light to avoid glare.

RAPID FOCUS

Mechanism that allows the light beam to be adjusted quickly.

TEMPERATURE CONTROL SYSTEM

Technology that automatically lowers the output to protect from overheating.

COOLING TECHNOLOGY

Dissipates heat generated by extended headlamp use.

TRANSPORTATION LOCK

Prevents the light from being turned on inadvertently.

BLUE LIGHT

Equipped with a blue LED light for use in fog and smoky conditions.

GREEN LIGHT

Equipped with a green LED light for increased run time and nighttime visibility.

RED READING LIGHT

Equipped with a red LED light for better nighttime visibility and emergency situations.

EMERGENCY LIGHT

Designed to turn on automatically when the power goes out and the headlamp is on its charging station.

BLUETOOTH®

Designed with Bluetooth® smartphone connection via app for personalized settings, timer, etc.

MAGNETIC CHARGE SYSTEM

Easily recharge the headlamp via a magnetic USB cable.
